INTEGRATED DUST COLLECTORS WINDSOR TYPE AF 1000 & AF 2000

- Designed, built and cared for in New Zealand
- Superior engineering
- Best performance guaranteed
- Unsurpassed reliability
- Realistically priced

	AF 1000 Specification	AF 2000 Specification
Fan	Material handling ø150mm inlet	Material handling ø200 inlet
Motor	1.1 kW 2 pole 1 phase	2.2 kW 2 pole 3 phase
Air Flow	0.42m ³ /sec	0.85m ³ /sec
Collection Bag	200 litres (40 gal)	200 litres (40 gal)
Filter Cloth Type	FM11 SDR polyester needle felt	FM11 SDR polyester needle felt
Filter Cloth Area	7m ² *	12.4m ² *
Cone Diameter	ø1000	ø1200

* Based upon 2 metre and 3 metre high filter bags respectively.

APPLICATION

AF 2000

This unit will typically handle 3 off 150mm connections, or 2 @ 150 and 2 @ 100mm.

AF 1000

This smaller unit will handle 1 off 150mm connection, 2 @ 125mm or 3 @ 100mm.

IMPORTANT NOTE

Wherever practical, it is recommended that the dust collector is located away from the main working area and that the ducting is correctly sized (we can advise on this). We recommend solid galvanised steel ducting, although flexible can also be used but can reduce suction at the machines due to the internal convolutions.

We also recommend that all machine offtakes are fitted with slide-gate dampers which can be closed when any particular machine is not in use.
